Lab Assignment 2

Due date: 04/11/2019

1. Make a Python program that displays the lyrics of a song. Save it with the name `mySong.py`. Use single and multi-line comments to elaborate meanings of lines and stanzas.

Execute the code, both on command line and IDLE. Save the screenshots of the output.

2. Write down the output of each piece of code of Home Activity 4. Give the reason of getting an error output (if any).
3. Make a program that
 - Displays several numbers.
 - Solves and shows the summation of $64 + 32$.
 - Does the same as in 2, but make it `sum=x+y`
 - Prints the word 'Lucky' inside s.
 - Prints the day, month, year in the format "Today is 2/2/2016"

Asks user his/her phone number and displays it like: "Your phone number is: XXXXXXXXXX"; where XXXXXXXXXX is the phone number.
